ADVANCED ORTHODONTICS PROGRAM

 **2026-2027**

 **BUCHAREST, ROMANIA**

Session 1 - FACE concepts and diagnostic

20-22 November 2026

Dr. Adina Sirbu, Dr. Andrei Iacob & Dr. Bogdan Geamanu

Session 2 - TMJ and splints

20-22 January 2027

Dr. Domingo Martin, Dr. Adina Sirbu, Dr. Bogdan Geamanu & Dr. Andrei Iacob

Session 3 - Treatment Mechanics

26-28 March 2027

Dr. Alberto Canabez, Dr. Adina Sirbu, Dr. Bogdan Geamanu & Dr. Andrei Iacob

Session 4 - Multidisciplinary Treatment

21-23 May 2027

Dr. Adina Sirbu, Dr. Bogdan Geamanu & Dr. Andrei Iacob

- **Session 5 - Treatment of growing patients. From mixed dentition to adolescence.**

- **18-20 June 2027**

Dr. Adina Sirbu, Dr. Bogdan Geamanu & Dr. Andrei Iacob

ADVANCED ORTHODONTICS PROGRAM

2026-2027

BUCHAREST, ROMANIA

The **FACE Advanced Orthodontics Program** is Romania's most comprehensive orthodontics course. This program has been running since 2011, and in 2026, we will commence the 10th group. The course will guide you through all treatment aspects, starting with an extensive diagnostic that considers the aesthetic factors of dentition and the overall status of the masticatory system: TMJ health, periodontal health, tooth aesthetics, facial aesthetics, and function.

From the diagnostic phase, we proceed to the treatment plan and how to tailor it to each patient's condition. We will learn how to plan treatment in 2D using VTO and in 3D with setup, as well as how to select the best option for the patient.

The applied mechanics will be directly linked to the chosen treatment plan and include fixed appliances and aligners. Interdisciplinary cases are becoming increasingly common, making it crucial to establish specific working protocols with other specialties, which you will receive during the multidisciplinary sessions.

- The course will also cover the treatment of growing patients, addressing all the unique aspects involved. In addition to these topics, the program features cutting-edge digital technology, ranging from 3D imaging to jaw motion digital recording and 4D treatment planning. It will be an incredible journey, and by the end, you will undoubtedly become better clinicians with a broader perspective on orthodontic care.

SESSION 1

FACE CONCEPTS & DIAGNOSTIC

20-22 November 2026

**BUCHAREST,
ROMANIA**

Dr. Adina Sirbu

Dr. Andrei Iacob

Dr. Bogdan Geamanu

Speakers

- Introduction to the FACE concept
- Concepts of Functional Occlusion: Andrews Six Keys to Occlusion
- Digital 2D diagnostic: Cephalometry, VTO, Overlays
- Intraoral and extraoral photography
- Intraoral scanners and Arc of closure axis recording. Tips and tricks
- Taking of centric records (3D and 4D digital)
- Introduction to 4D diagnostic tools: Modjaw dynamic records
- Handling STL and DICOM . Taking full advantage of the information.

SESSION 3

**FACE TREATMENT MECHANICS.
FIXED APPLIANCES AND
ALIGNERS**

26-28 March 2027

**BUCHAREST,
ROMANIA**

- Treatment Mechanics in the permanent dentition
- Closing Mechanics - Sequence and treatment protocols
- Anchorage: concepts and management
- Treatment Sequence and Wire Sequence
- Orthodontic palatal structures for anchorage
- Corticotomies
- Aligners, Tooth Movements and Treatment Mechanics
